Academic Integrity issues will not be tolerated in this course.  
Complete Seneca's Academic Integrity module and share the link  
to your badge  
<https://cfdev.senecacollege.ca/tl/forstudents/integrityinaction/>

Reflect on a project that you've participated in. This project does not have to be Information Technology related. Did you team use Predictive, Agile or a hybrid methodology. Tell me about your experience.

- ➔ I have been participated in the Seneca's Hackathon 2022, this year. Me and my team members have been working on a small inventory application, which stores database of the products. We have created the application through the Agile methodology, and after implementing the agile methodology, our process of making the application became so easy to implement, and it became efficient to carry each phases of the development, making our process of application making quicker and easier.

Download Visual Paradigm and practice! Recreate the class diagrams and object level sequence diagram in the attached material. Be sure to change the note to reflect your name and section. Copy the diagrams into this word document and attach the .vpp file to your assignment.
