**Defining Classes Labs – Part 1**

This is an individual lab. Read the attached Defining classes lab.

Use your model from the Introduction lab as a starting point

Your tasks:
1. Add to your class diagram the remaining classes to support the Systems Use Case Specifications in the defining classes labs.
2. Copy and paste your diagrams in to a .docx compatible file. Submit your .docx or PDF file along with your .vpp (visual paradigm) file.
